

Trauma-based Mind Control

Trauma-based mind control exists today because of research begun at Britain's Tavistock Institute in 1921. The scientists there wanted to find the breaking point of the human mind. Nazi doctors continued the work during World War 2, then after the war Operation Paperclip brought many of those doctors to the United States. They (the Nazis) were put to work by the CIA.

The most notorious of the CIA's mind control projects was Monarch, which tortured children in order to splinter their minds. It was found that once a new personality was created it could be trained to perform specific functions. Many of today's top athletes owe their success to trauma-based conditioning, as do many entertainers, spies, politicians and so forth.

Mind-controlled slaves don't usually know what's been done to them. Their different personalities aren't aware of one another. Because of this slaves can lead what seem to be normal lives, until they're needed for a mission. A programmed personality is then activated and the person changes. How many times have you heard that the school shooter was a quiet person before the shooting?

Entertainment slaves are used to promote Satanism and other practices that degrade humanity and destabilize society. You might be watching a mind-controlled slave if his or her show displays occult symbolism. People often refer to this as "Illuminati" symbolism. The Illuminati is an umbrella organization that was established for the purpose of unifying various secret societies and powerful bloodlines. Freemasons, Jesuits, Kabbalists and so forth make up the Illuminati, so that's why you see such a mish-mash of symbolism in their public rituals. Super Bowl halftime shows can usually be counted on to provide a flamboyant "demon summoning."

I've collected some information about all of this [here](#), and the links below go to informative articles:
